IMPORTANT.

ORISSA.

MEMORANDUM FOR OFFICIAL USE ONLY.

The following is circulated for the information of the heads of new offices and departments created on account of the separation of Orissa as well as of existing offices :—

1. The Government of India (Constitution of Orissa) Order, 1936, provides generally for the administration of the new Province. The new Province comprises the existing Orissa Division of Bihar and Orissa and parts of the Presidency of Madras and the Central Provinces. Introductory.

2. A draft of the *Orissa Gazette* has been issued in advance, which will show the provisional decisions regarding many matters, some of which require the confirmation or approval of the Government of India. As soon as possible after 1st April 1936, offices will be told which of these notifications are confirmed and which are not. The draft Gazette gives a great deal of information and should be carefully studied.

3. The general idea underlying the arrangements made for the separation of Orissa has been to make as little change as possible in the existing laws and systems of administration in force in its various component parts. The transition period which now begins, will give the Orissa Government time to make such other changes as may be found necessary in the light of experience.

4. The general rule is that the laws now in force in the respective areas will continue to apply in these areas without any change unless expressly altered. For instance, the Madras Co-operative Societies Act, 1932, will remain in force in the Madras area of the Province, while the Bihar and Orissa Act will remain in force in the Bihar and Orissa areas, (and will be specially extended to the Central Provinces area.) Laws. Savings.

But the laws in force in one area may be repealed or amended and other laws may be extended thereto by Regulations of the Governor-General in Council, under section 71 of the Government of India Act, 1935. Extension and repeals.

All such changes are embodied in the Orissa Laws Regulation, 1936, a (draft) copy of which is printed in the draft Gazette. It (read with its schedules) will show what laws are extended to the areas in Orissa and what laws are repealed. Orissa Laws Regulation, 1936.

Where a local Act is extended to an area in which it did not apply before 1st April 1936, it should be understood that unless specifically provided otherwise, the statutory rules under the Act are also extended to the area so far as they are applicable. Local Act and Statutory rules.

The all-India Acts which apply to the component areas in the Province will continue to remain in force along with the rules made by the Governor-General, in the new Province, according to their tenor, unless repealed. All-India Acts and Statutory rules.

There may also be different Statutory Rules under these Acts made by the different Provinces at present. These different rules will also continue to apply in their respective areas as before, unless specifically repealed or replaced by other rules.

5. Attention is drawn to some of the changes embodied in the Orissa Laws Regulation, 1936, viz.— Mention of particular Acts and Regulations.

The Regulation, inter-alia, contains a special provision repealing the Madras Police Act of 1859 in the Madras area and extending the Police Act of 1861 thereto. It, however, preserves the rules, notifications, etc., under the Madras Police Act so far as they are not inconsistent with the Police Act. Police Acts.

The Madras Civil Courts Act, 1873, and the Central Provinces Courts Act, 1917, are repealed in the Madras and Central Provinces areas respectively, Civil Courts Acts.

and the Bengal, Agra and Assam Civil Courts Act, 1881, is extended to them, preserving the rules, etc., made under the repealed Acts.

Medical Registration Acts.

As there are important differences between the Medical Registration Acts of Bihar and Madras and the Central Provinces the three Acts have been repealed by the Orissa Laws Regulation, 1936, and replaced by the Orissa Medical Registration Regulation, 1936, which provides for a small nominated Medical Council. The Council will be responsible for preparing a Medical Register, and existing registered Medical practitioners in the new Province will have the right to have their names transferred to the new Register free of charge.

Angul and Khondmals Regulations.

Two other Regulations deserve notice. These are the Angul Laws Regulations and the Khondmals Laws Regulation. The existing district of Angul will be divided into two *districts* of Angul and Khondmals. The Collector of Cuttack will also be ex-officio the Deputy Commissioner of Angul, and similarly the Collector of Ganjam for the Khondmals. So also will be Superintendents of Police of Cuttack and Ganjam respectively. The two new regulations reproduce as closely as possible the existing Angul Regulation of the year 1913 with such modifications as are necessary for the purpose of making each regulation applicable only to its own area when the existing Angul district becomes split up into two districts.

Transfers of Executive authority.

6. The Schedule to the Orissa Laws Regulation will show how references in different Acts and rules to certain bodies, officers, or gazettes in the parent provinces, are to be read as references to corresponding bodies, officers or gazettes in Orissa. Other transfers of duties are provided for by notifications in the draft Gazette. Orissa Heads of Departments and Departments of Government in the Secretariat should in future be addressed in place of those of the parent Provinces. In the absence of specific provision, references to officers and official bodies in the various enactments and rules in force in the new Province must be construed as references to corresponding officers functioning in the new Province although under different designations.

Orissa Consolidation of Appeals Regulations, 1936.

The Revenue Commissioner will therefore be the highest revenue authority in Orissa. Certain of the Revenue Acts in Bihar and Orissa provide for an appeal to the Commissioner and a second appeal to the Board. As the result of combining the functions of the Board and the Commissioner of Orissa Division in the Revenue Commissioner, the appellate and the revisional powers vested in him should be deemed to be consolidated and the period of limitation should be the longest provided for such appeals or revisions. The Orissa Consolidation of Appeals Regulations, 1936, gives effect to this object.

Registrar, Co-operative Societies.

The Registrar of Co-operative Societies, Madras, will continue to be the Registrar in the area transferred from Madras and the Registrar at Patna will continue to be the Registrar in the remaining area. But there will be one Deputy Registrar for the whole of Orissa.

Pending cases and appeals.

As regards the disposal of cases pending in courts on 1st April 1936, and the courts to which appeals and revisions should be preferred against decision of the courts, directions will be issued by the Governor-General in Council. IMPORTANT.

ORISSA.

MEMORANDUM FOR OFFICIAL USE ONLY.

The following is circulated for the information of the heads of new offices and departments created on account of the separation of Orissa as well as of existing offices :—

1. The Government of India (Constitution of Orissa) Order, 1936, provides generally for the administration of the new Province. The new Province comprises the existing Orissa Division of Bihar and Orissa and parts of the Presidency of Madras and the Central Provinces. Introductory.

2. A draft of the *Orissa Gazette* has been issued in advance, which will show the provisional decisions regarding many matters, some of which require the confirmation or approval of the Government of India. As soon as possible after 1st April 1936, offices will be told which of these notifications are confirmed and which are not. The draft Gazette gives a great deal of information and should be carefully studied.

3. The general idea underlying the arrangements made for the separation of Orissa has been to make as little change as possible in the existing laws and systems of administration in force in its various component parts. The transition period which now begins, will give the Orissa Government time to make such other changes as may be found necessary in the light of experience.

4. The general rule is that the laws now in force in the respective areas will continue to apply in these areas without any change unless expressly altered. For instance, the Madras Co-operative Societies Act, 1932, will remain in force in the Madras area of the Province, while the Bihar and Orissa Act will remain in force in the Bihar and Orissa areas, (and will be specially extended to the Central Provinces area.) Laws. Savings.

But the laws in force in one area may be repealed or amended and other laws may be extended thereto by Regulations of the Governor-General in Council, under section 71 of the Government of India Act, 1935. Extension and repeals.

All such changes are embodied in the Orissa Laws Regulation, 1936, a (draft) copy of which is printed in the draft Gazette. It (read with its schedules) will show what laws are extended to the areas in Orissa and what laws are repealed. Orissa Laws Regulation, 1936.

Where a local Act is extended to an area in which it did not apply before 1st April 1936, it should be understood that unless specifically provided otherwise, the statutory rules under the Act are also extended to the area so far as they are applicable. Local Act and Statutory rules.

The all-India Acts which apply to the component areas in the Province will continue to remain in force along with the rules made by the Governor-General, in the new Province, according to their tenor, unless repealed. All-India Acts and Statutory rules.

There may also be different Statutory Rules under these Acts made by the different Provinces at present. These different rules will also continue to apply in their respective areas as before, unless specifically repealed or replaced by other rules.

5. Attention is drawn to some of the changes embodied in the Orissa Laws Regulation, 1936, viz.— Mention of particular Acts and Regulations.

The Regulation, inter-alia, contains a special provision repealing the Madras Police Act of 1859 in the Madras area and extending the Police Act of 1861 thereto. It, however, preserves the rules, notifications, etc., under the Madras Police Act so far as they are not inconsistent with the Police Act. Police Acts.

The Madras Civil Courts Act, 1873, and the Central Provinces Courts Act, 1917, are repealed in the Madras and Central Provinces areas respectively, Civil Courts Acts.

and the Bengal, Agra and Assam Civil Courts Act, 1881, is extended to them, preserving the rules, etc., made under the repealed Acts.

Medical Registration Acts.

As there are important differences between the Medical Registration Acts of Bihar and Madras and the Central Provinces the three Acts have been repealed by the Orissa Laws Regulation, 1936, and replaced by the Orissa Medical Registration Regulation, 1936, which provides for a small nominated Medical Council. The Council will be responsible for preparing a Medical Register, and existing registered Medical practitioners in the new Province will have the right to have their names transferred to the new Register free of charge.

Angul and Khondmals Regulations.

Two other Regulations deserve notice. These are the Angul Laws Regulations and the Khondmals Laws Regulation. The existing district of Angul will be divided into two *districts* of Angul and Khondmals. The Collector of Cuttack will also be ex-officio the Deputy Commissioner of Angul, and similarly the Collector of Ganjam for the Khondmals. So also will be Superintendents of Police of Cuttack and Ganjam respectively. The two new regulations reproduce as closely as possible the existing Angul Regulation of the year 1913 with such modifications as are necessary for the purpose of making each regulation applicable only to its own area when the existing Angul district becomes split up into two districts.

Transfers of Executive authority.

In the absence of specific provision, references to officers and official bodies in the various enactments and rules in force in the new Province must be construed as references to corresponding officers functioning in the new Province although under different designations.

Comptroller of Accounts, Orissa.

The Registrar of Co-operative Societies, Madras, will continue to be the Registrar in the area transferred from Madras and the Registrar at Patna will continue to be the Registrar in the remaining area. But there will be one Deputy Registrar for the whole of Orissa.

Pending cases and appeals.

7. As regards the disposal of cases pending in courts on 1st April 1936, and the courts to which appeals and revisions should be preferred against decision of the courts, directions will be issued by the Governor-General in Council. CIRCULAR ORDER NO. 5 OF 1936.

XXX-13-36.

Dated Patna, the 25th March 1936.

High Court, English Department, Civil.

Notwithstanding anything contained in Chapter I, Part VII of the Patna High Court's General Rules and Circular Orders, Volume I, any legal practitioner in actual practice upon a current licence of the High Court of Madras or Nagpur, other than an advocate enrolled under the Indian Bar Councils Act, and who ordinarily practised before the 1st of April, 1936, in any judicial district of Madras or the Central Provinces any part of which has been transferred to the province of Orissa shall, subject to such conditions as attach to his existing certificate, be allowed to practise in the Courts subordinate to the Patna High Court upon his existing licence until the 31st of July 1936, or, if an application for enrolment in this High Court is made on or before that date, until orders have been passed on such application. Any such practitioner will be entitled to apply for enrolment, without admission fee, in this High Court, subject to the same conditions as attach to his existing licence, or such other similar conditions as may be necessary by reason of change of the local Government and the High Court, provided he presents his application on or before the 31st of July, 1936, stating his name and qualifications, and together with his existing certificate, to the Judge of the district in which he intends ordinarily to practise. In the case

of a first grade pleader of the Madras High Court the application should also state the two other contiguous judicial districts under this High Court to which the applicant wishes his licence to extend. The application will be forwarded by the Judge to the Registrar of the High Court for orders, with such remarks as he may think fit to make thereon, and in particular regarding the applicant's right to be enrolled in this High Court as a regular practitioner in a district any part of which has been transferred to Orissa.

2. Any legal practitioner enrolled in this High Court in accordance with this order shall have his name removed from the roll of the Madras or the Nagpur High Court, as the case may be, within a period of three months from the date of his enrolment in this Court. Failure to do so and intimate the fact shall render him liable to have his name removed from the roll of this Court, and he shall thereupon cease to be entitled to practise or act in this Court or in any Court subordinate to this Court.

3. The Court may in its discretion relax all or any of the conditions laid down by this order in the case of a particular legal practitioner or a particular class of legal practitioners.

4. Advocates under the Bar Councils Act whose names appear on the roll of the Madras or the Nagpur High Court shall, on application, be enrolled in this Court in accordance with the rules that may be framed in this connection by the local Bar Council with the previous sanction of this Court.

32. (1) In every factory in which any process mentioned in Appendix I or any other process involving contact by the workers with injurious or obnoxious substances is carried on, a suitable and sufficient supply of water for washing together with soap and nail brushes shall be provided free of cost for the use of such workers at suitable places and with suitable facilities.

(2) Proper arrangements shall be made for maintaining in a cleanly and drained condition every wash place provided under this rule and the area around every place where drinking water is distributed to the workers employed in the factory.

Ventilation.

Sections 14 and 32(*a*) and (*f*).

General ventilation.

33. (1) In every room in a factory in which workers are ordinarily employed and which is not ventilated by mechanical means, there shall be sufficient openings in the walls or roof for the admission or egress of air to maintain the atmosphere in the room in a fresh and reasonably cool condition.

(2) If in any part of a factory the Inspector, having due regard to the weather conditions then prevailing, considers the atmosphere to be unduly vitiated or stagnant and that this is due to insufficient openings, he shall by written order require the manager to—

(*a*) increase the openings in the walls or in the roof to an aggregate area equal to 75 per cent of the area found by the applicable formula in Appendix II, or to such less extent as he deems reasonable in the circumstances, or

(*b*) provide mechanical means to produce a continuous change of air at the rate of three complete changes in the hour or at such less rate as he deems sufficient in the circumstances.

Sections 16 and 32 (*f*) and (*g*).

Measures required for cooling.

34. If in any room of a factory the cooling properties of the air appear to the Chief Inspector of Factories to be at times sufficient to secure workers against injury to health or serious discomfort and he considers that they can be to a great extent increased at a reasonable cost he may by written order require the manager to carry out any or all of the following measures before a specified date.—

(*a*) Electric or other fans to be used to produce adequate movement of air over the workers. The Chief Inspector

of Factories may require such movement to be such that the rate of cooling by evaporation at a height of five feet from the floor level, as found by the use of a kata thermometer, is two and a half times what it would be if the air were not moved by such fans.

(*b*) The height of the room from floor to roof or ceiling to be increased to a height of 18 feet or such less height as the Chief Inspector of Factories deems reasonable in the circumstances.

(*c*) A layer of tiles, wood or other substance which is bad conductor of heat to be added to the roof or substituted for other materials.

(*d*) Sun shades of specified size to be placed before or fitted to such openings as admit direct sunlight upon the workers.

Sections 14 and 32 (*a*) and (*f*).

Ventilation in new factories or rooms.

35. In any factory or part of a factory which has been built or brought into use on or after the 1st January 1936, no worker shall be allowed to work unless—

(*a*) if no mechanical means of general ventilation is employed, the ventilating openings in every room where workers are ordinarily employed are of not less aggregate area than that found from the applicable formulæ in Appendix II, or

(*b*) if the ventilation is by mechanical power, the fans or other means employed are of such capacity as to pass through the room three times in every hour a volume of air equal to the cubic capacity of the room,

(*c*) where no other room is superimposed, the roof or ceiling if there is one, is either more than 20 feet above floor level or in the alternative includes a sufficient layer of earthenware tiles, wood, compressed asbestos or other substance which is a bad conductor of heat, or is constructed with an air space not less than six inches in depth open to the atmosphere at the eaves and in the case of sloping roofs, having sufficient egress for hot air at the apex.

Provided that where the Chief Inspector is satisfied that the rule may be relaxed with due regard to the health of the workers employed, he may in Form I exempt the factory or a specified part of it from the provisions of this rule to such extent and on such conditions as he considers suitable in the circumstances.

Extraction of dust and gas.

36. (1) In any part of a factory in which any process is carried on in which dust, gas or vapour is generated and inhaled to an extent likely to cause injury to the health of the workers, efficient exhaust and inlet ventilators shall be provided to secure that the dust, gas or vapour is drawn away from the workers at, or as near to as is reasonably possible, the point at which it is generated, and ducts shall be provided to carry the dust, gas or vapour without leakage to a place of deposit in which it cannot be injuriously inhaled by workers.

(2) If in any factory the Inspector considers that the dust, gas or vapour produced or liberated at any point is not removed or deposited in accordance with sub-rule (1), he shall by written order require the manager to instal before a specified date either—

(*a*) at such point a container from which dust, gas or vapour cannot escape so as to be injuriously inhaled, but can be removed when requisite without being injuriously inhaled by any worker, or

(*b*) at such point, or so situated as to serve several points, a fan of sufficient power or other means of abstracting all the

dust, gas or vapour, together with the requisite ducts, free from leakage, and a depositing chamber or chambers of adequate capacity made and installed in accordance with the current standard of construction of such apparatus :

Provided that steam, the products of combustion in fires, furnaces or explosion engines, and any dust, gas or vapour which the Inspector declares in writing to be unobjectionable when discharged into the open air in reasonable quantities and at a reasonable position or height above the buildings, may be so discharged.

Extraction apparatus in new factories.

37. (1) The processes of cleaning, hulling, shelling, publishing, mixing, grinding or bagging grain, and of sifting, mixing or packing tea, or any process producing dust, gas or vapour shall not be carried on in any factory or part of a factory built or brought into use after the 1st day of January 1936 unless every point of dust, gas or vapour production is equipped in accordance with clauses (*a*) and (*b*) of sub-rule (2) of rule 36.

(2) Plans and specifications of factories submitted to the Inspector under rules 45 and 46 after 31st December 1935 shall indicate the positions in the factory at which any of the processes mentioned in sub-rule (1) ought to be carried on and the plant or appliances used in such processes, and shall clearly show and specify the apparatus installed for removing dust, gas or vapour.

Humidity.

Sections 15(1) and 32(*g*).

Humidity arising from leakage.

38. Any leakage in vessels, pipes or glands, or any evaporation of water from tanks or vessels which results in the liberation of steam or water vapour into any room in a factory in which workers are ordinarily employed so as unduly to humidify the air or to cause discomfort to workers shall be remedied by the manager as soon as is practicable in the circumstances of the case.

Sections 15(1) and 32(*f*).

Humidifying by steam.

39. (1) In any room in which steam pipes are used for the introduction of steam for the sole purpose of artificial humidification of the air the diameter of such pipes shall not exceed 2 inches, and in the case of pipes installed after 30th June 1935 the diameter shall not exceed one inch. Such pipes shall be as short as is reasonably practicable and effectively covered with insulating material which shall be kept in good repair to the satisfaction of the Inspector.

(2) All hangers supporting pipes carrying steam for humidification shall be separated from the pipe by an efficient insulator not less than half an inch in thickness; and no uncovered jet from such a pipe shall project more than 4½ inches beyond the outer surfaces of such covering.

(3) The steam pressure employed for artificial humidification shall be as low as is practicable and shall not in any case exceed 70 lbs. per square inch.

(4) Steam shall not be used for the humidification of any room in which the dry bulb temperature exceeds 85°.

Cleaning of humidifying plant and water.

40. (1) All plant and apparatus for the artificial humidification of air, by whatever method, shall be kept clean whether in use or not.

(2) The Inspector may make or order to be made by the manager such tests as he deems necessary to ascertain the purity of the water used for increasing the humidity of the air in any factory.

(3) Water used for increasing humidity in a factory shall not be deemed to have been effectively purified if, while at the temperature of

the room humidified by it, it absorbs from an acid solution or permanganate of potash in four hours more than 0.5 grain of oxygen per gallon of water.

Limits of artificial humidification.

41. (1) Subject to sub-rule (2), artificial humidification shall not be practised in any room in a factory in which workers are ordinarily employed, when the wet bulb reading of the hygrometer is higher than that given in the Table in Appendix III against the simultaneous dry bulb reading of the hygrometer; or, if the dry bulb reading includes a fraction of a degree, when the dry bulb reading does not exceed the wet bulb by the difference shewn in the table for the dry bulb figure next below in the table.

(2) Sub-rule (1) shall not apply when—

(*a*) the difference between the wet bulb temperature as indicated by the hygrometer in the room and the wet bulb temperature taken with a hygrometer placed in the shade outside the building is less than 3.5 degrees; or

(*b*) the cooling power of the atmosphere in the room at a height of five feet from the floor in all usual working places is greater than 11 as measured by " wet " readings of a katathermometer taken in accordance with the printed instructions supplied by the maker with the instrument, and at such times as are required by the Inspector.

Provision of hygrometers.

42. In each room of a factory wherein apparatus for artificial humidification of the atmosphere is installed, there shall be provided and maintained at least one hygrometer; and in large rooms a greater number may be required by the Inspector who shall also specify the position in which each hygrometer is to be kept. He may also require a hygrometer to be maintained in a specified position outside the building.

Construction and maintenance of hygrometers.

43. To be approved by the Chief Inspector a hygrometer must be in accordance with the specification in Appendix III, and it must be maintained throughout its period of employment in correct working order and as follows :—

(*a*) the reservoir shall be kept full of water which shall be changed completely at a fixed time once in every day;

(*b*) the wick and the muslin covering of the wet bulb shall be renewed once a week;

(*c*) no water or other liquid shall be applied directly to the wick or to the muslin covering;

(*d*) if the Chief Inspector so requires by written order, the water used in the reservoir in any factory or in the factories of any specified locality shall be distilled water or pure rain water;

(*e*) there shall be interposed between the hygrometer and any wall, pillar or other object to which it is fixed, at least half an inch thickness of wood or other non-conductor of heat, so disposed as to be not less than one inch distant from the bulb of either thermometer.

Hygrometer readings.

44. (1) From each hygrometer maintained under rule 42 the wet and dry bulb temperature shall be accurately recorded, at a time or times in each working day fixed by the Inspector, by competent persons nominated by the manager and approved by the Inspector.

(2) The temperature taken under sub-rule (1) shall be entered as a continuous record in Form K. At the end of each month the person who has taken the readings shall sign the form in certification of the correctness of the entries.

(3) No reading taken within 15 minutes after the changing of the water in the reservoir shall be included in the records required by this rule.

(4) A legible copy of Appendix III shall be exhibited close to every hygrometer from which readings are taken under this rule.

(*d*) has a greater dimension in plan than 50 feet, and

(*e*) in which the walls, pillars, stanchions, trusses, beams, lintels or arches have to bear any extraneous load;

no work on a manufacturing process shall be commenced in any building erected or taken into use as part of such factory after the date of the commencement of the Act, unless a certificate of stability in Form L has been filled in in its entirety in ink, signed in ink by a person duly qualified in accordance with sub-rule (2), forwarded to the Inspector and accepted in writing by the Chief Inspector.

Fencing and safeguarding of machinery, hoists, pits, etc.

Sections 24 and 32(*a*) and (*g*).

General requirements in a machine fence.

62. (1) All machinery or parts thereof including electric fittings, switches or circuits, which are required by these rules to be fenced or guarded, shall be protected in such a manner as to afford adequate security against risk of accident to the persons attending the machinery or to any other person who may be in the vicinity of it.

(2) Machinery fencing, except when circumstances render it impossible, must be located so close to the machine that it is neither necessary nor practicable for any person to pass between the machine and the fence:

Provided that nothing in this rule shall prevent the inclusion in a fence of as many slidable or swingable rails as may in the opinion of the Inspector be necessary to give temporary access for the purpose of starting an engine.

(3) Subject to sub-rule (5) fencing shall be made either of metal or of substantial members of wood which is either insect-proof or impregnated after cutting and before joining together with an insect-proof of compound, all parts being securely fastened together in a workmanlike and permanent manner.

(4) The posts, rails and panels or other part of every fence shall be of sufficient thickness in relation to their length or extent to sustain safely and without appreciable bending any load or impact which is likely to come upon them in service; and the fence must be securely fastened to the ground or to the machine or some immovable object.

(5) In every fence the spaces between the fence framing shall be completely and securely filled in with panels of sheet metal, expanded metal or other stout and durable material, unless the frame members of the fence are, in the opinion of the Inspector, sufficiently close together to serve the same purpose. When panels are not fitted toe-boards shall be fitted to all fences which stand upon the ground or on a walk-way or scaffold.

(6) Fences which stand upon the ground to give protection from machinery or pits shall not have a height less than three feet six inches, and shall have at least two horizontal rails giving vertical openings not more than one foot nine inches.

(7) Fences made of bamboo secured together with rope or otherwise may be used temporarily only in emergency and shall be replaced with fencing constructed in accordance with the provisions of sub-rules (1) to

(6) within one week of erection or such longer period as the Inspector may permit by an order of exemption in Form I.

(8) In cases where a fixed fence cannot be used to give protection from flying chips or the like, the manager shall provide portable screens where these can be effectively used; and where screens are not an adequate protection, he shall provide goggles for each worker within range.

Transmission machinery fences.

63. The following parts of transmission machinery shall be securely fenced if in motion and within reach :—

(i) all shafts, couplings, collars, clutches, toothed wheels, pulleys, driving straps, chains and ropes, except such as are in the opinion of the Inspector by reason of their construction or position as safe to every person employed in the factory as they would be if securely fenced or guarded;

(ii) all projecting set-screws, keys, nuts or bolts or revolving parts except such as are countersunk or otherwise made equally safe;

(iii) the underside of all heavy overhead main driving belts or ropes if there is any possibility of persons having to pass under them.

64. The following parts of machine tools shall be securely fenced :—

The back gears and change wheels of lathes; the back gears and bevel gearing of drilling machines; and the gear wheels of planing, shaping, slotting and milling machines which are within reach.

65. Every power press for the blanking, drawing, stamping or otherwise forming small articles, and every platen machine in a printing works, shall be fitted with an efficient finger guard.

Guillotines and similar machines.

66. Every guillotine for cutting paper and every similar cutting machine fed by hand shall be equipped with a finger guard properly constructed and as efficient as the conditions permit.

Tea machinery.

67. In every tea factory the roll-table shall be fenced so that the operator is kept beyond reach and can remove the leaf only by using a brush.

Fencing and precautions for abrasive wheels.

68. (1) All power-driven abrasive wheels, other than grindstones of natural stone and small manufactured wheels used only for precision grinding shall be mounted, equipped and used in accordance with this rule.

(2) They shall be mounted and secured on the spindle in such manner that the portion of the wheel near the centre is free from pressure from the spindle and from the securing flanges.

(3) The manager shall not permit any wheel to be revolved at a speed greater than that recommended by the maker or supplier as the safe maximum speed for a wheel of that class and diameter.

(4) Wheels of a diameter of six inches or more shall be enclosed circumferentially, except for an opening not exceeding 90 degrees, of which not more than 65 degrees shall be above the work rest, by a strong metal guard which shall be secured to the machine body by fastenings of a strength at least equal to that of the peripheral part of the guard.

(5) The thickness of the peripheral part of the guard shall be in accordance with the table given in Appendix VI.

(6) Guards of ordinary cast iron, where permissible under the table in Appendix VI, may be used only when the wheel is carried between protective flanges, that is to say, concave or dished flanges correctly embracing a wheel of convex or tapering section for at least one half of its diameter :

Provided that when in the opinion of the Inspector the work to be ground upon the wheel renders the application of sub-rule (4) impossible, he may grant in Form I an order exempting that machine when being so used from the provision of sub-rule (4) on condition that the wheel is carried between protective flanges as described in sub-rule (6) and on such other conditions as he may think fit to impose.

Wood-working machinery.

69. (1) No wood-working machine shall be used in a factory unless it is so equipped that it can be stopped conveniently and quickly by the operator.

(2) At every wood-working machine which is fed by hand there shall be provided a push-stick of suitable size and shape to enable the operator to feed the machine without risking his fingers unnecessarily, and it shall be the duty of the manager to enforce the use of such push-sticks.

(3) All circular saws shall be provided with a strong metal fence or guard and with a riving knife at the back of the saw. The guard and knife shall be of a design and construction approved by the Inspector. The saw beneath the table shall be completely fenced.

(4) (*a*) Every planing machine shall be provided with a bridge guard of the full width of the cutters and adjustable to suit the work being done.

(*b*) No planing machine installed in a factory after 31st December 1935 shall be used unless the cutter block is cylindrical.

(5) In every chain-mortising machine the chain shall be provided with a guard enclosing the cutters so far as is practicable; and such work as cannot be done on the machine with the guard in position shall be manipulated in a holder of such construction as to reduce the risk of injury to the operator as much as possible.

Fencing and precautions for textile machinery.

70. In addition to the provision contained in rules 62 to 69 (both inclusive), the following special provisions shall apply to textile factories to the extent therein indicated :—

(*i*) In respect of blowing room machinery :—

(*a*) Beater covers and the door immediately above the dirt grid of all openers, combined openers and scutchers, scutcher lap machines, hard waste breakers and similar machines shall be fitted with an automatic locking arrangement which shall render it impossible to open the covers of the grid doors while the beater is still running, or to restart the machinery until the doors have been closed.

(*b*) The nip between the cage wheels and calender wheels shall, if practicable, be protected by spectacle guards, extending round the outer edge of both wheels or if this is not practicable in some other efficient manner.

(*c*) Fender guards shall be provided for the fan strap side of scutchers to guard the fan strap and slow motion strap, provided that where the slow motion pulley is driven directly by a strap from the overhead shaft, it shall be optional either to plate the wheel or to protect it by a fender guard. If the fan strap is on the opposite side to the slow motion strap, each strap shall be protected separately.

(*d*) All lap rollers shall be provided with lap protectors.

(*e*) Cotton openers, combined openers and scutchers, scutchers and lap machines, hard waste breakers and similar machines shall be driven from counter shafts provided with fast and loose pulleys and efficient belt shifters.

(*a*) The roller gearing shall be effectively covered.

(*b*) The undershaft shall be encased in a metal sleeve or otherwise securely fenced.

(*iv*) In respect of speed frames :—

(*b*) Bobbing skew gear wheels shall be covered over the top, and these covers shall be extended both in front and behind round the edge of the wheels, except in those cases where the spindles are not cleaned whilst the machinery is in motion.

(*c*) Spindles skew gear wheels shall be effectively covered.

(*d*) Lifter rack wheels shall be securely fenced, and the guard shall be such that it will effectively protect the nip both as the rail rises and as it falls.

(*v*) In respect of self-acting mules :—

(*a*) Guards for middle back shaft scrolls shall be fitted with flanges to protect the intake of the hands and the side of the scroll. The guards for the middle draw band carrier pulleys shall be either fixed to the bottom creel board, or be so fastened otherwise that they cannot readily be knocked aside. The side pieces of the guard shall be extended inwards far enough completely to guard the nip between the band and the scroll.

(*b*) All headstocks shall be provided with a strong sheet iron guard high enough to cover the rim pulley and so shaped as to prevent any moving portion of the machinery being reached from the back when the guard is in position.

(*c*) The guards for the end draw band pulleys shall be extended at least half an inch beyond the end of the pulley.

(*d*) All quadrant pinions shall be securely fenced.

(*e*) All front and back carriage wheels shall be guarded by efficient toe-guards.

(*vii*) In respect of calendering machines :

All calendering machines shall be provided with an efficient ' nip ' guard along the whole length on the intake side of each pair of bowls, and shall be so fitted and maintained while the machine is in use as to prevent the access of any person's fingers to the point of contact of the rollers or bowls.

Fencing and precaution for ginning factories.

71. In addition to the provisions contained in rules 64 to 69 (both inclusive), the following special provisions shall apply to cotton-ginning factories to the extent herein indicated :—

(*a*) The line shaft or second motion in cotton-ginning factories shall be completely enclosed by a continuous wall or unclimbable fencing with only so many openings as are necessary for access to the shaft for removing cotton seed, cleaning and oiling; and such opening shall be provided with gates or doors which shall be kept closed and locked.

(*b*) The tooth rollers of the opener shall be guarded by securely fixing across the machine not more than eight inches above the lattice a stout wooden plank or strong metal guard not less than 15 inches in width so arranged that in no circumstances can a man's hand get into the rollers.

(*c*) The spur gearing at the side of the opener shall be completely covered by a strong metal guard.

(*d*) The crank shaft pulleys and roller pulleys of all gins shall be securely guarded by strong box guards and hinged top covers.

Protection of pits, tanks, heights, etc.

Sections 24 and 32(*a*), (*f*) and (*g*).

Guarding of wells, pits, tanks, etc.

72. (1) The positions specified in this rule shall be securely protected by fences, barriers or coverings, that is to say all—

(*a*) pits, tanks, reservoirs, wells or the like ordinarily containing hot or injurious substances,

(*b*) pits, wells, hoist wells, excavations and abrupt changes of ground or floor level more than 18 inches deep, and

(*c*) gutters more than 18 inches wide, except such as are in the opinion of the Inspector as free from danger as if they were so protected.

(2) Men working aloft whether regularly or temporarily shall be provided with adequate scaffolding equipped with a rail or a stretched rope waist-high and with either toe-boards at both edges or with receptacles to prevent the dropping of tools.

Hoist gates.

73. All hoist gates shall be—

(1) self-locking and only capable of being opened when the cage is opposite the floor, or

(2) if exempted by the Inspector from compliance with the provisions of sub-rule (1), shall be otherwise controlled in some safe and efficient manner to be specified by the Inspector.

Exemptions from fencing.

74. If in the case of any factory the manager is able to show to the satisfaction of the Inspector that fencing or other safeguard required by any of the rules 62 to 73 (both inclusive) would unduly restrict any manufacturing process or for any other reason be impracticable, the manager shall provide such other protection as shall be required by the Inspector.

Railways in factories.

Section 32(*c*).

75. Rules 76—90 apply to railways in the precincts of a factory which are not subject to the Indian Railways Act, 1890.

Gateways.

76. A gateway through which a railway track passes shall not be used for the general passage of workers into or out of a factory.

Barriers and turngates.

77. (1) Where buildings or walls contain doors or gates which open on to railway track, a barrier about 3 feet 6 inches high shall be fixed parallel to and about 2 feet away from the building or wall outside the opening and extending several feet beyond it at either end, so that a person passing out may become aware of an approaching train when his pace is checked at the barrier. If the traffic on the nearest track is all in one direction, the barrier shall be in the form of an L with the end of the short leg abutting on to the wall and the other end opening towards an approaching train.

(2) If the distance between wall and track cannot be made to accommodate such a barrier, the barrier or a turngate shall be placed at the inside of the opening.

(3) Where a footway passes close to a building or other obstruction as it approaches a railway track, a barrier shall be fixed at the corner of the building projecting several feet from it in a direction parallel to the track, so that a person approaching the track is compelled to move away from the building and thus obtain timely sight of a train approaching behind it. Where the footway is too narrow to permit of this a turngate shall be installed.

Crowds.

78. (1) Workers pay windows, first aid stations and other points where a crowd may collect shall not be placed near a railway track.

(2) At those times of the day when the employees are starting or ending work, all railway traffic shall cease for not less than five minutes.

Provided that the Chief Inspector may in Form I exempt a specified factory from the provision of sub-rule (2) if he is satisfied that in the special circumstances of such factory the enforcement of the rule is not necessary to safe-guard the employees.

Locomotives.

79. (1) Every locomotive (and tender) shall be provided with efficient brakes, all of which shall be maintained in good working order. Brake shoes shall be examined at suitably fixed intervals and those that are worn replaced at once.

(2) Water-gauge glasses of every locomotive whatever its boiler pressure may be, shall be protected with substantial glass or metal screens.

(3) Every locomotive shall be fitted with a "cow catcher" or if this is impracticable, with "guard-irons", at each end.

(4) It shall be clearly indicated on every locomotive crane in English and in the vernacular for what weight of load and at what radius the crane is safe.

Wagons.

80. Every wagon (and passenger coach if any) shall be provided either with continuous self-acting brakes or with efficient hand-brakes in good working order and capable of being applied by a person on the ground and fitted with a device for retaining them in the applied position.

Riding on vehicles.

81. (1) No person shall be permitted to be upon (whether inside or outside) any locomotive or vehicle whether standing or in motion, except in the performance of his regular duties.

(2) No person, whether on duty or not, shall be permitted to ride on the outside of any locomotive or vehicle except where secure foothold and hold are provided.

Attention to brakes and doors.

82. (1) No vehicle shall be left unattended unless its brakes are firmly applied and, where the railway is on a gradient, without a sufficient number of properly constructed scotches placed firmly in position.

(2) No train shall be set in motion until the shunting jamadar has satisfied himself that all wagon doors are securely fastened.

Projecting loads and cranes.

83. (1) If the load on a wagon projects beyond its length, a guard or dummy-truck shall be used beneath the projection.

(2) No loco-crane shall travel light unless the jib is completely lowered into the running position in line with the track.

(3) When it is necessary for a loco-crane to travel with a load, the jib shall not be swung until the crane has come to rest.

Loose-shunting.

84. (1) Loose-shunting shall be permitted only when it cannot be avoided. It shall never be performed on a vehicle not accompanied by a man capable of applying and pinning down the brakes. A vehicle not provided with brakes in good working order and capable of being easily pinned down shall not be loose-shunted unless attached to at least one other vehicle with such brakes. Loose shunting shall not be performed with, or against, a vehicle containing passengers, live-stock or explosives.

(2) For the purpose of this rule "loose-shunting" means the placing of a vehicle by giving it such an impetus from the locomotive that it can run alone to the desired position.

Fly-shunting.

85. (1) Fly-shunting shall not be permitted on any factory railway.

(2) For the purposes of this rule "fly-shunting" means giving an impetus to vehicles as in loose-shunting but with the vehicles unattached (with or without some distance between them), and placing one vehicle (or set of vehicles) on one track and then smartly reversing the points so that the following vehicle or the locomotive takes the other track.

The shunting jamadar.

86. (1) Every train in motion in a factory shall be in charge of a properly trained shunting jamadar.

(2) Before authorising the driver to proceed the shunting jamadar shall satisfy himself that no person is under or between the vehicles or on the track in front of the train. He shall not call on the driver while any person is going off the track but only when all persons have gone off it.

Hand signals.

87. The hand signals used by the shunting jamadar by day and by night shall be those prescribed by the shunting rules of railways working under the Indian Railways Act (IX of 1890).

Night work and fog.

88. (1) In factories where employees work at night no movements of railway vehicles otherwise than by hand shall be permitted by the manager between sunset and sunrise unless the tracks and their vicinity are lighted on a scale of not less than one foot candle as measured at ground level out of doors by any recognised type of photometer or illumination meter at a time when the atmosphere is free from dust or obscuring fumes.

(2) In no circumstances shall any train be moved, otherwise than by hand, between sunset and sunrise or at any time when there is fog, unless it carries a white head light and a red rear light.

Speed control.

89. (1) Trains shall not be permitted by the manager to proceed at speeds greater than four miles per hour.

(2) A train shall not be moved by mechanical or electrical power unless it is preceded at a distance of not less than 30 yards during the whole of its journey by the shunting jamadar. He shall be provided with the signalling flags or lamp necessary for its control by day or by night, and with a whistle for calling the attention of the driver:

Provided that the Chief Inspector may in Form I exempt a specified factory or specified part of it, or all or any of the trains traversing it, from the operation of all or any of the provisions of this rule on such terms and conditions as he considers necessary for safety.

New tracks.

90. (1) Trains shall not be moved by power upon any railway track installed in a factory after 31st December 1935 unless the railway, its equipment and vehicles conform with this rule.

(2) The distances (*a*) between tracks and (*b*) between tracks and buildings or blind walls and (*c*) tracks and material deposited on the ground shall be respectively not less than—

(*a*) from centre to centre of parallel tracks, the overall width of the widest wagon of that gauge plus twice the width of the door of such a wagon when opened directly outwards, plus 3 feet;

(*b*) from a building or wall other than a loading platform to the centre of the nearest track, half the overall width of the widest wagon of that gauge, plus the width of the door of such wagon when opened directly outward, plus 5 feet;

(*c*) from material stacked or deposited alongside the track, on the ground or on a loading platform, to the centre of the track, half the width of the widest wagon of that gauge, plus the width of its door when opened directly outward, plus 3 feet;

Provided that the Chief Inspector may in Form I exempt a specified factory or specified part of it from all or any of the provisions of this sub-rule to such extent and on such conditions as he deems necessary.

(3) Within the factory precincts sleepers shall not be raised above ground level.

(4) All track ends shall be equipped with buffer stops of ample strength.

(5) Barriers of substantial construction shall be securely and permanently fixed across any doorway or gateway in a building or in a wall which conceals an approaching train from view, between the building and the track as prescribed in sub-rule (1) of rule 77.

(6) Where tracks are carried on a gantry or other elevation, a safe footway or footways with hand rails and toe-boards shall be provided at all positions where persons work or pass on foot; and where there is an opening in the stage of an elevated track for the dropping of material to a lower level, the position shall be adequately fenced or the opening itself provided with a grill through which a person cannot fall.

(7) All point levers shall have their movements parallel to, not across, the direction of the track.

(8) All loading platforms which are more than 2 feet above the level of the ground on which the track is laid and more than 50 feet in length shall be provided with steps at intervals not greater than 50 feet apart to enable the platform to be easily mounted from the track.

(9) On every locomotive weighing 15 tons or more when empty the brakes shall be capable of being applied by steam or other power as well as by hand; or there are separate and distinct power and hand brakes.

Motor vehicles.

Speed of cars.

91. No road motor vehicle shall be permitted to be driven at a speed exceeding 10 miles per hour within the precincts of a factory :

Provided that in the case of large factories with departments separated by considerable distances and having roads of ample width, the Inspector may grant exemption in Form I from this rule to such extent and on such terms as he deems suitable.

Car-lights.

92. No motor vehicle shall be driven at night within the precincts of a factory unless it conforms in respect of lights to the law in force on public roads in that locality.

Safety of Young Children.

Sections 28(1) and 32(*b*).

93. A child under the age of twelve shall not, unless it is in charge of its mother or some other woman on whom it is dependent, and is being taken to or from a room reserved within the factory for the use of children, be permitted to enter or remain in any room or part of a factory or its compound in which there is—

(*a*) any accessible machine or shaft in motion,

(*b*) any matches or fireworks in process of manufacture or packing,

(*c*) any hot metal or accessible fire,

(*d*) any wire or apparatus charged with electricity to a pressure in excess of 220 volts,

(*e*) any accessible tanks containing hot liquid or liquor, or any liquid or liquor to a depth of more than 18 inches, or

(*f*) any accessible railway track.

Section 32(*b*).

Scales of first-aid appliances.

94. (1) The manager of every factory shall after the 31st June 1935 maintain for the use of the workers, without any charge to them, stores of appliances for giving first aid to injured workers. Subject to rule 95 such appliances shall be on the applicable scale in Appendix VII and shall be stored and maintained as therein specified.

(2) First-aid cupboards or boxes provided under this rule shall be distinctively marked with a red cross on a white ground, and a similar sign shall be provided outside every ambulance room. Nothing other than first-aid appliances shall be kept in first-aid cupboards or boxes. The key of each first-aid cupboard or box shall be kept by suitable persons appointed by the manager, of whom one at least shall be present during all working hours.

(3) The ambulance rooms shall be used only for the treatment and resting of injured or sick workers.

(4) All first-aid appliances shall be of good quality, and a sufficient reserve stock shall be retained by the manager.

Exemption from scale.

95. If the Chief Inspector is satisfied that there is sufficiently close to a factory a dispensary or hospital in which adequate first aid can be obtained for persons injured in the factory without charge to them during all the hours in which the factory works, or if he is satisfied that in any factory or class of factories a particular kind of accident is improbable, he may exempt in Form I, the manager of the factory from rule 94 or from providing part of the appliances given in the scale in Appendix VII which is applicable to that size of factory.

Classification and Reporting Accidents.

Sections 30 and 32(*a*).

Marking of Pressure Vessels.

(Rule 47.)

(*i*) cut into the metal lightly but legibly, or

(*ii*) outlined clearly in " pop marks made with a centre punch, or

(*iii*) painted on in a colour contrasting with the background

APPENDIX V.

Examination, Test and Renewal of Chemical Fire Extinguishers.

(Rule 50.)

At intervals not greater than one year every chemical fire extinguisher in the factory shall be examined, tested or renewed by the manager or his representative. Unless there is anything to the contrary in the maker's printed instructions, the following shall be done at each annual examination.

I. *The Soda-Acid Type.*—(*a*) The weight is to be tried by handling to ascertain whether the container is full of liquid or not.

(*b*) A little liquid is to be tipped out into a cup or the like and tested with red litmus paper, which should turn a deep blue almost immediately. If the change takes an appreciable time it indicates a weak solution, which may arise from faulty filling or from breakage of the acid bottle either accidentally or by discharge of the extinguisher. If the solution is weak, the extinguisher is to be re-charged.

(*c*) If a crystalline (as distinct from an amorphous) deposit is found round the discharge nozzle, the extinguisher is to be opened up and the acid bottle examined carefully for any slight crack. If cracked, the extinguisher is to be re-charged completely.

II. *The Foam or Froth Type.*—Is to be discharged and recharged.

III. *The Carbon Tetra-Chloride Type—Quart size with pump.*—(*a*) The weight is to be tried by handling, to ascertain whether full of liquid or not. Any deficiency of liquid is to be made good.

(*b*) The pump is to be tested, the jet being directed into a jug or suitable vessel. If the pump works satisfactorily, the liquid will be poured back into the extinguisher. The whole of this operation should be performed as quickly as possible to minimise the evaporation of the liquid. If the pumping is not satisfactory, repair or renewal is to be made.

IV. *Carbon Tetra-Chloride Type with gas cartridge instead of pump.*—When the liquid is expelled by the release of gas, instead of by a pump, it is only necessary to ascertain that the gas cartridge is intact.

V. At each yearly examination the manager, or his representative shall question the persons likely to have the operation of an extinguisher in emergency, and unless satisfied that they understand the use of each type provided he shall demonstrate by discharging one extinguisher of each type which is not clearly understood.

(4) DIRECTIONS

To be kept in the First Aid Box.

CUTS AND WOUNDS.

Wash with CARBOLIC ACID LOTION diluted with an equal part of water. Then bind with lint soaked in the diluted lotion. Then cover with cotton wool. Then bandage.

SEVERE BRUISES.

Bind with lint soaked in GOULARDS LOTION. Then cover with cotton wool. Then bandage.

BURNS.

Bind with lint soaked in PICRIC ACID LOTION. Then cover with cotton wool. Then bandage.

INFLAMED OR PAINFUL EYES.

Bathe well with cotton wool soaked in boric lotion made by mixing one teaspoonful of boric powder in a tumblerful of tepid water.

The eye should then be bandaged to exclude light and *dust;* or if both eyes are affected, and it is necessary for the patient to see, blue goggles may be worn.

When one eye is unaffected, do not touch it after touching the inflamed eye, as this is likely to spread the complaint to both eyes.

SPECKS IN THE EYE.

A hard or sharp instrument should not be used for removing specks from the eye except by a doctor. Use either—

(1) the corner of a handkerchief or the like dipped in boric lotion and twisted up into a point, or

(2) a match stick (of the larger size) with the head cut off and the other end whittled down to form a long wedge coming to the thinnest possible edge. Steep this for a few seconds (in boric lotion) to soften it, then knead between a fold of clean linen (or a bandage or something of the sort) to remove loose fibres of wood. The flat point will then be slightly yielding if accidentally pressed against the eye.

Do not hold ANY implement pointing directly towards the eye, but always sideways.

SNAKE BITE.

With the lancet make two crossed cuts where the fangs have entered. Then rub in permanganate of potash crystals.

FAINTING.

Stimulants should not be given when there is serious bleeding as they tend to increase it. If the injured person seems likely to faint, the sal-volatile bottle should be held to his nose. If a sniff of it does not revive him let him drink a teaspoonful of sal-volatile mixed in half a wineglassful of water. Keep him lying down, or sitting down with his knees drawn up and his head between them. Loosen his clothes, especially round the neck.

SEVERE BLEEDING.

Sponge the place with the coldest water available. Keep the patient lying flat if possible, the injured limb raised high. If pressing

DISEASE IS CAUSED BY LIVING GERMS SO SMALL THAT NO EYE CAN SEE THEM.

GERMS ARE DESTROYED, AND DISEASE AVOIDED, BY USING A LOTION OF CARBOLIC, PERMANGANATE OF POTASH, ETC.

a pad on the wound does not stop the bleeding, the blood-vessel supplying the place must be compressed by lapping the limb with a stout cord. If the right place to apply the cord is not known, try several places, beginning inwards from the wound, i.e., nearer the heart. If necessary apply two cords one on each side of the wound.

FURTHER TREATMENT.

Unless satisfied that first aid is all that is required, send the injured person to a doctor at once; or if unfit to be moved, send for the doctor. If satisfied that nature will cure the injury without medical help, warn the patient that cleanliness is necessary.

WHEN FINISHED.

Always wash everything that has been used in carbolic lotion, and return to the First Aid Box at once, and lock up the box immediately to exclude dust and germs.

The following Bill was introduced in the Legislative Assembly on the 6th March 1936 :—

L. A. BILL No. 4 OF 1936.

A Bill to remove certain doubts and to establish the validity of certain proceedings in High Courts of Judicature in British India.

2. No decree passed or order made by the High Court of Judicature at Fort William in Bengal, the High Court of Judicature at Madras or the High Court of Judicature at Bombay, in the exercise of its ordinary original civil jurisdiction under clause 12 its Letters Patent, or by the High Court of Judicature at Rangoon, in the exercise of its original civil jurisdiction under clause 19 of its Letters Patent, shall be called in question in any proceedings before any other Court on the ground that the High Court passing the decree or making the order had no jurisdiction to pass or make the decree or order.

Restoration of proceedings.

3. Where in any proceedings concluded or after the 26th day of August, 1935, any such decree or order has been found to be invalid on such ground by any Court, such finding shall be void and of no effect; and

the Court shall, notwithstanding anything to the contrary in the Indian Limitation Act, 1908, or any other law for the time being in force, on application made within six months from the commencement of this Act by any person prejudicially affected by such finding, restore the proceedings at and continue the proceedings from the stage reached immediately before the order embodying or based on such finding was made.

IX of 1908.

STATEMENT OF OBJECTS AND REASONS.

The Court of the Judicial Commissioner of the Central Provinces has recently in two judgments passed on the 26th August and the 11th September, 1935, held that certain decrees passed or orders made by the Bombay High Court in the exercise of the jurisdiction which that Court conceived it possessed under clause 12 of its Letters Patent were made without jurisdiction.

Clause 12 of the Letters Patent of the Bombay High Court, which is identical in terms with clause 12 of the Letters Patent of the Madras and Calcutta High Courts and corresponds to clause 10 of the Letters Patent of the Rangoon High Court, has been variously interpreted by the several High Courts, and the question of amending the clause is under consideration.

This Bill is designed to obviate in the meantime the inconvenience which would result if the decrees or orders of a High Court acting in the exercise of its ordinary original civil jurisdiction, as the Court itself interprets that jurisdiction, proved infructuous in another Court which favoured a different interpretation.

(a) in clause (d) and clause (e), after the word Committee " the words " or the Governing Body or the Advisory Board " shall be inserted; and

(b) after clause (p) the following clause shall be inserted, namely :—

"(pp) provide for the periodical inspection by persons appointed in this behalf by the Governor General in Council of the Indian Lac Research Institute and other maintained by the Committee;"

Amendment of section 9, Act XXIV of 1930.

7. In section 9 of the said Act, in clause (c) after the word " Committee " the words ", the Governing Body, the Advisory Board " shall be inserted.

STATEMENT OF OBJECTS AND REASONS.

Under the Indian Lac Cess Act (XXIV of 1930) a cess is levied on lac and refuse lac exported to countries outside India at the rate of four annas and two annas per maund respectively with the object of providing funds for the improvement and development of the cultivation, manufacture and marketing of Indian lac. It is now proposed to increase this cess to 7 and 5 annas per maund respectively in order to provide the Indian Lac Cess Committee with more adequate funds for these purposes. To bring the results of successful research at the Lac Research Institute to the notice of lac growers, a demonstration organisation has recently been set up by the Lac Research Institute at Ranchi which will be expanded as experience is gained. To meet the increasing competition of synthetic substitutes the Lac Cess Committee has found it necessary to extend its work on the industrial applications of Indian lac and is now financing important schemes of research and scientific intelligence amongst the lac-consuming industries in the United Kingdom and in the United States of America. A Shellac Research Bureau has been established in London which is staffed by three Indian scientists, deputed from India for the purpose, who are working in collaboration with scientific and industrial research associations in the United Kingdom. The Committee has also made a grant to the Research Bureau of the United States Shellac Importers' Association for research and propaganda work in America. As regards scientific intelligence the Special Lac Officer attached to the office of the High Commissioner keeps the Indian Lac Research Institute at Ranchi in touch with technical particulars of consumers' requirements and also provides the Indian research workers who are working for the Committee in England with up to date technical information. Up to the present these research activities on the industrial side have cost some 2½ lakhs of rupees and this amount has been met out of the Committee's accumulated reserves. But an increased regular income is necessary to carry on this work which is of vital importance to the future of lac.

The proposal for the increased cess has been accepted by the Indian Lac Cess Committee and by the Governments of the Provinces mainly concerned, *viz.*, Bengal, the United Provinces, Bihar and Orissa, the Central Provinces and Assam.

2. It is also proposed to take this opportunity to re-organise the Lac Cess Committee on the model of the Imperial Council of Agricultural Research so as to provide for a logical division of functions into general and technical and appropriate machinery for the most efficient handling of both. Under these proposals the Committee will consist of two parts—the Governing Body which will be entrusted with questions of policy and the administration and the control of the Lac Cess Funds, and the Advisory Board which will deal with the scientific and technical aspects of the Committee's work.

3. It is further proposed that, in addition to the power of control contained in section 6 (2) of the Indian Lac Cess Act, 1930 (XXIV of 1930), the Governor General in Council should have explicit authority to arrange for the periodical inspection of the Lac Research Institute and of any other institution maintained at the cost of the lac cess funds.

4. It is also proposed to authorise the Committee, subject to the control of the Governor General in Council, to spend lac cess funds on patenting discoveries made by its employees, should this be found necessary.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

MONTHLY WEATHER AND CROP REPORT OF BIHAR AND ORISSA FOR FEBRUARY, 1936.

I. Character of the season.—During the month under report light to moderate rain fell in all the districts of the province. The fall was below the normal everywhere except Champaran and the districts of Orissa Division where it was above the normal.

II. Progress of agricultural operations.—Harvesting and crushing of sugarcane went on. Planting of sugarcane was going on in Puri and Palamau. Threshing of winter paddy was still in progress in Orissa. *Dalua* paddy was in ears in Cuttack and thriving in Puri. Harvesting of spring oilseeds and *rabi* crops was going on.

III. State of standing crops.—Standing crops including sugarcane were generally fair. Some damage was done to the *rabi* crops by insect pests in parts of Palamau due to cloudy weather.

IV. Prospect and probable outturn of harvest.—The condition factor for spring oilseeds has been estimated at 74 per cent of the past ten years' average and that for winter rice at 71 per cent.

V. Damage to standing crops.—No damage to standing crops by abnormal cause was reported except what is noted in paragraph III above.

VI. Condition of agricultural stock.—Cases of cattle-disease were reported from all the districts in the province except Patna, Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Balasore, Angul and Hazaribagh.

VII. Fodder and water-supply.—The supply of fodder and water was reported to be sufficient in all the districts of the province, but fodder was scarce in parts of Purnea.

VIII. Price of common rice.—During the last week of the month, the price of common rice as compared with that of the previous week, fell in three, rose in one district and remained stationary elsewhere. It varied from 10 seers a rupee in Gaya, Monghyr, Bhagalpur and Singhbhum to $17\frac{13}{16}$ seers in Angul, the average price was 12·22 seers against 13·41 seers at the corresponding time of last year.

IX. Condition of agricultural population.—The condition of the agricultural population was on the whole satisfactory.
